## VCADS Pro, Operations

The following VCADS Pro operations are available for function group 4.

### Tests

Operation	Use
17012-3 Error codes	Read error codes, always done first.
40012-3 Position sensor, gear selector, test	Testing gear selectors.
40025-3 Solenoid valves, test	Check solenoids. Possible to see the pressure with connected pressure gauge.
40901-3 Sensors, transmission, test	When checking sensors, make sure that they give a reasonable value.
42102-3 Travel direction, test	Checks SE4209.
42103-3 Lock-up, sensor and solenoid valve, checking	Checks sensor and solenoid. Possible to see the pressure with connected pressure gauge.

### Calibrating

Operation	Use
42101-3 Transmission, calibrating	Calibration shall be run: <ul style="list-style-type: none"><li>— When changing transmission.</li><li>— If transmission has been dismantled.</li><li>— When changing V-ECU.</li><li>— When changing components that may affect pressure.</li></ul>

### Programming

Operation	Use
36646-3 - MID187 ECU, programming	Programming V-ECU

Document Title: <b>Error codes when calibrating</b>	Function Group: <b>400</b>	Information Type: <b>Service Information</b>	Date: <b>2014/4/18</b>

## Error codes when calibrating

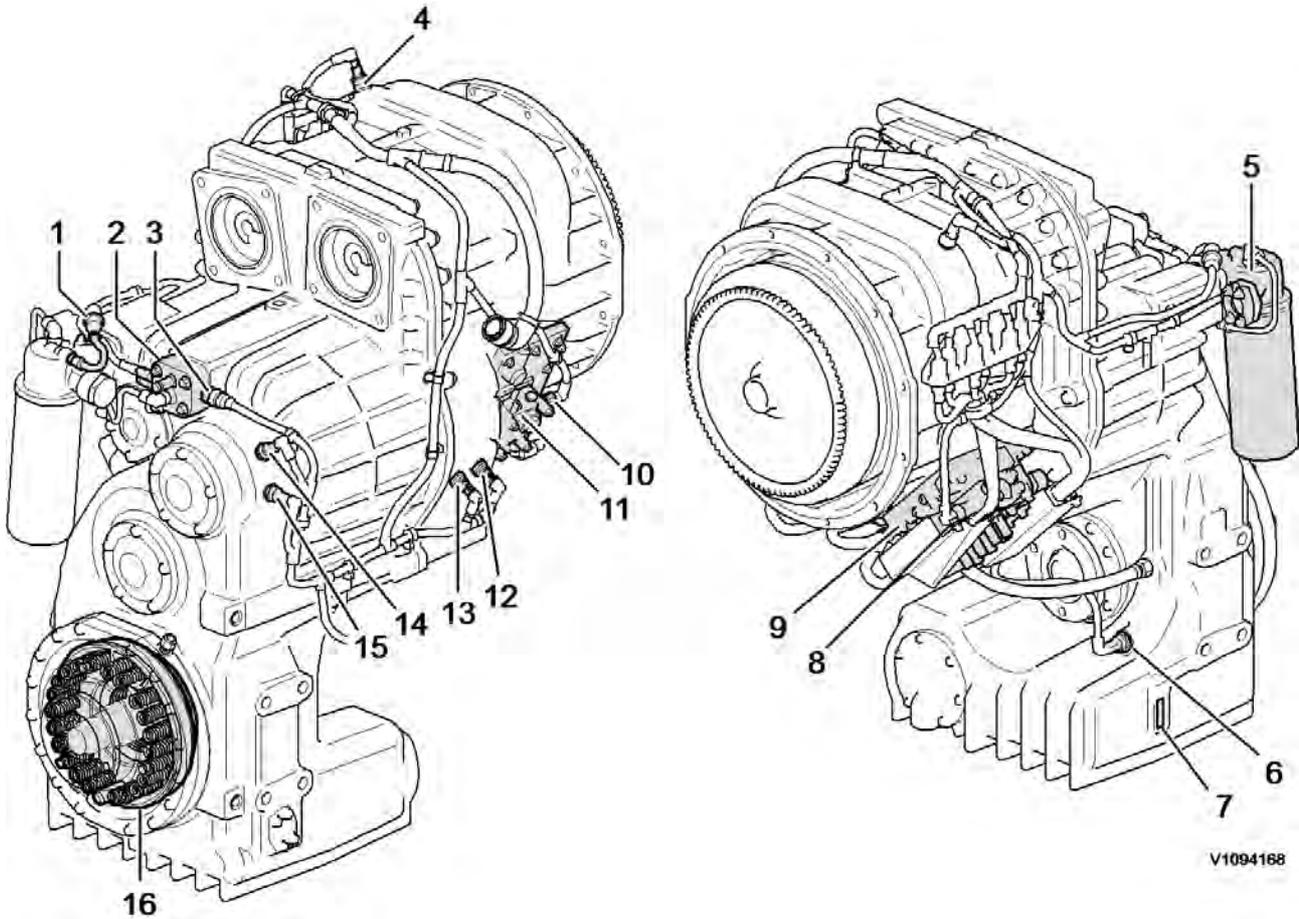

When calibrating the hydraulic transmission with VCADS Pro, the following error messages may be shown.

Error message	Possible cause	Check/Action
An undefined error/failure has occurred.	VCADS Pro does not recognize the value.	Restart calibration. VCADS Pro, 40901-3 Sensors, transmission, test. VCADS Pro, 40025-3 Solenoid valves, test. Checking pressure, <a href="#">421 Hydraulic transmission, checking oil pressure</a> Check-measuring solenoids <a href="#">302 PWM4213 - PWM4218, description and measuring</a>
The turbine rpm did not reach the lower rpm level during calibration of each clutch.	Failure turbine rpm sensor. Binding solenoid core. Binding in disc pack. Oil leakage in clutch shaft.	VCADS Pro, 40901-3 Sensors, transmission, test. VCADS Pro, 40025-3 Solenoid valves, test. Checking pressure, <a href="#">421 Hydraulic transmission, checking oil pressure</a> Check-measuring solenoids <a href="#">302 PWM4213 - PWM4218, description and measuring</a>
The turbine rpm did not leave the lower rpm level during calibration of each clutch.		
The calibration values are above the upper level for each clutch.		
The calibration values are below the lower level for each clutch.		
Too big difference between values for subsequent calibrations.
