INTRODUCTION

Use FOS Manuals for Reference

This technical manual is part of a twin concept of service:

The two kinds of manuals work as a team to give you both the general background and technical details of shop service.

•FOS Manuals—for reference

Fundamentals of Service (FOS) Manuals cover basic theory of operation, fundamentals of trouble shooting, general maintenance, and basic types of failures and their causes. FOS Manuals are for training new personnel and for reference by experienced service technicians.

When a service technician should refer to a FOS Manual for more information, a FOS symbol like the one at the left is used in the TM to identify the reference.

Technical Manuals—for actual service

Technical Manuals are concise service guides for a *specific* machine. Technical manuals are on-the-job guides containing only the vital information needed by an experienced service technician.

Use Technical Manuals for Actual Service

This technical manual was planned and written for you—an experienced service technician. Keep it in a permanent binder in the shop where it is handy. Refer to it whenever in doubt about correct service procedures or specifications.

Some features of this technical manual:

- Table of contents at front of manual
- Exploded views showing parts relationship
- Photos showing service techniques
- Specifications grouped for easy reference

This safety alert symbol identifies important safety messages in this manual. When you see this symbol, be alert to the possibility of personal injury and carefully read the message that follows.

Crawlers - JD350-B TM-1032 (Oct-80)

Transmission

Type..... Manually selected, sliding gear with four forward speeds and one reverse Travel speeds, mph (no slip):

| Gear | 1500 rpm | 2100 rpm | 2500 rpm |
|------|----------|----------|----------|
| 1st | 0.9 | 1.2 | 1.4 |
| 2nd | 1.2 | 1.6 | 1.9 |
| 3rd | 2.0 | 2.8 | 3.3 |
| 4th | 3.9 | 5.5 | 6.5 |
| Rev. | 1.2 | 1.6 | 1.9 |

Direction Reverser

Type Hydraulic, wet clutches, reversing "on the go" without declutching engine.

Steering-Brakes

Type Multiple-disk clutches and contracting band. Manual: Standard Power Steering-Brakes: Optional with integral reservoir (early models), pump and cylinders

Power Take-Off

Type..... Transmission-driven, rear, 540 rpm at 1620 rpm engine speed

Track and Track Frame

Five rollers non-oscillating, one carrier roller each side. Hydraulic track adjusters, 36 track shoes per side.

Track shoes (types and sizes): Grouser, 12 or 14-inch. Notched open-center grouser, 12 or 14-inch. Triple semi-grouser open-center, 12 or 14-inch. Rubber, 10inch. Open-center 33-inch.

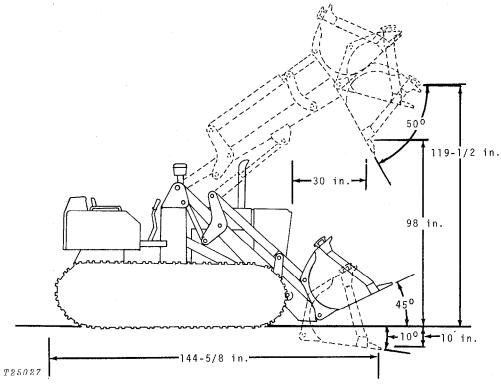

Weight Distribution

| | Loader | 6300 | Bulldozers 6305 | 6310 |
|---------------------------------|--------|--------|--------------------|--------|
| SAE Operating Weight (lbs.)* | 12,400 | 10,300 | 10,600 | 10,400 |
| Ground Contact (Sq. In.) | 1,662 | 1,940 | 1,940 | 1,940 |
| Ground Pressure (PSI) | 7.2 | 5.3 | 5.5 | 5.4 |
| Track on Ground (Inches) | 69.3 | 69.3 | 69.3 | 69.3 |

* 1973 Representative Tractor Includes fully serviced tractor, 175 lb. operator, and R.O.P.S.

Capacities (U.S. Standard Measures)

| Fuel tank |
|---|
| Cooling system |
| Engine crankcase (including filter) |
| Transmission case |
| Direction reverser case |
| Final drives, each |
| Crawler tractor hydraulic system 16 qts. (min.) |
| Crawler loader hydraulic system (including |
| reverser) |
| Winch housing reservoir |
| |

JD350-B Operating Dimensions

DIMENSIONS (Crawler Tractor)

| Maximum height (with exhaust stack) 84 in. |
|--|
| Height to top of hood 52 in. |
| Over-all width (with 12-inch shoes) 60-1/8 in. |
| Over-all length |
| Ground clearance at rear crossbar 13-1/4 in. |
| Shipping weight (approx.) 8,560 lbs. Gasoline |
| 8,630 lbs. Diesel |

DIMENSIONS (Crawler Loader)

| Maximum height (with exhaust stack) | |
|--|--|
| Height to top of hood 52 in. | |
| Over-all width (with 12-in. shoes) 66 in. | |
| Over-all length (with weights) 144-5/8 in. | |
| Clearance (at rear crossbar) 13-1/4 in. | |
| Total weight (with bucket and counter- | |
| weights) | |

| wolgine) | |
|----------|-------------|
| Gasoline | 11,860 lbs. |
| Diesel | 11,930 lbs. |

| Dumping reach (full height) (bucket at |
|--|
| 45° angle) |
| Dumping clearance (full height) (bucket at |
| 45° angle) |
| Maximum lift (full height) 119-1/2 in. |
| Digging depth below ground (bucket at |
| 10° angle) |
| Bucket width (3/4 cu. yd. size) 66 in. |
| Dump angle (full height) 50° |
| Bucket roll-back (ground level) 45° |
| Grading angle |
| Turning clearance circle (carry |
| height, bucket rolled back) 234 in. |
| Lifting capacity |
| Breakout force 12,100 lbs. |
| |

Group 10 PREDELIVERY, DELIVERY, AND AFTER-SALES SERVICES

PREDELIVERY SERVICE

Because of the shipping factors involved, plus extra finishing touches that are necessary to promote customer satisfaction, proper predelivery service is of prime importance to the dealer.

A tag pointing out the factory-recommended procedure for predelivery service is attached to each new crawler before it leaves the factory. After completing the factory recommended dealer checks and services listed on the predelivery tag, remove the tag from the crawler and file it with the job shop order. The tag will then serve as a basis for certifying that the crawler has received the proper predelivery service when that portion of the customer's John Deere Delivery Receipt is completed.

TEMPORARY CRAWLER STORAGE

| Service | Specification | Reference | |
|--|--|--|--|
| Check radiator for coolant loss and antifreeze protection. | · · · · · · · · · · · · · · · · · · · | Section 10, Group 15 | |

| out reverser). | · · · · · · · · · · · · · · · · · · · | Section 50 |
| Shift transmission through all gears. | · · · · · · · · · · · · · · · · · · · | Operator's Manual |
| Check direction reverser. | | Section 50 |
| Check power take-off operation. | ····· | Operator's Manual |
| Check operation of 3-point hitch. | ••••• | Operator's Manual |

BEFORE DELIVERING CRAWLER—Continued

| Service | Specification | Reference |
|---|-----------------------|-------------------|
| Check hydraulic system operation. | | Operator's Manual |
| Check brake operation. | ····· | Section 60 |
| Check steering operation. | | Section 60 |
| Check bucket level indicator and electrical return-to-dig mechanism (if present). | | Operator's Manual |
| General | | |
| Tighten accessible nuts and cap screws. | Standard torque chart | Section 10 |

Clean crawler and touch up paint.

DELIVERY SERVICE

A thorough discussion of the operation and service of a new machine at the time of delivery helps to assure complete customer satisfaction. Proper delivery should be an important phase of a dealer's program. A portion of the John Deere Delivery Receipt emphasizes the importance of proper delivery service.

It is a well-known fact that many complaints have arisen simply because the owner was not shown how to operate and service his new machine properly. Enough time should be devoted, at the customer's convenience, to introducing the owner to his new machine and explaining to him how to operate and service it.

The following procedure is recommended before the serviceman and owner complete the delivery acknowledgements portion of the delivery receipt. Using the machine operator's manual as a guide, be sure that the owner understands these points thoroughly:

.

- 1. Controls and instruments.
- 2. How to start and stop the engine.
- 3. The importance of the break-in period.
- 4. How to use cast-iron ballast.
- 5. All functions of the hydraulic system.
- 6. The importance of safety.
- 7. The importance of lubrication and periodic services.

After explaining and demonstrating the above features, have the owner sign the delivery receipt and give him the operator's manual.

AFTER-SALES SERVICE

The purchaser of a new John Deere machine is entitled to a free inspection at some mutually agreeable time within the warranty period after the equipment has been "run in."

The purpose of this inspection is to make sure that the customer is receiving satisfactory performance from his machine. At the same time, the inspection should reveal whether or not the machine is being operated, lubricated, and serviced properly. If the recommended after-sales service inspection is followed, the dealer can eliminate a needless volume of service work by preventing minor irregularities from developing into serious problems later on. This will promote strong dealer-customer relations and give the dealer an opportunity to answer questions that may have arisen during the first few days of operation. During the inspection service, the dealer has the additional opportunity of promoting the possible sales of other new equipment.

The following is a recommended inspection program.

INSPECTION PROCEDURE

| Service | Specification | Reference |
|--|--|--------------------------|
| Cooling System | | |
| Check radiator coolant level. | Midway between core and filler neck | Operator's Manual |
| Check external surface of radiator core. | | Operator's Manual |
| Check hoses and connections for leaks. | | ••••• |
| Fuel System | | |
| Remove water and foreign matter from fuel pump and filter sediment | | |
| bowls. | | Operator's Manual |
| Bleed fuel system. | | Operator's Manual |
| Tighten loose connections and check entire system for leaks. Correct if necessary. | | |
| Check air cleaner cup, element, and unloading valve. Clean element if necessary. | ····· | Operator's Manual |
| Electrical System | | |
| Check specific gravity of battery. | 1.215 to 1.270 at 80° F. | Operator's Manual |
| Check level of battery electrolyte. | To bottom of filler neck above plates | Operator's Manual |
| Check belt tension. | 3/4-inch belt flex with 20-pound force | Operator's Manual |
| Start engine and check action of starter, lights and gauges. | · · · · · · · · · · · · · · · · · · · | Operator's Manual |
